

# Metal bipolar plate

Project	参数
Size	426.8mm*148.8mm*0.95mm
Effective reaction zone	310cm <sup>2</sup>
Runner Depth	Anode plate: 0.3mm Cathode plate 0.4mm
Channel period	1.4mm
Flatness	≤0.02mm
Contact resistance	4.2 mΩ2@0.6MPa
Constant potential corrosion current density	0.3μA/cm <sup>2</sup>
Durability	20000hour

## High precision and high-speed servo stamping

Ensure optimal parameters are achieved

## Precision compensation stamping technology

Ensure strict control requirements

## Independently developed non-precious metal coatings

The coating has small micro particles and good compactness
